# UNDERSTANDING IMPLANT RESTORATION

## SUCCESSFULLY RESTORE DENTAL IMPLANTS

Rocky Takhar

Nottingham

11<sup>th</sup> March 2026

ACADEMIA  
INNOVATING SIMPLICITY

## ROCKY TAKHAR

**Dr. Rocky Takhar**

**BDS, Special Interest in Dental Implants  
& Aesthetic Dentistry**

## SPEAKER PROFILE

Rocky qualified in Dentistry from CEU Cardenal Herrera University (Valencia, Spain) in 2016 and has worked across a range of practices in Nottingham ever since. He is best known for his calm, patient-focused approach and for delivering dentistry that is biomimetic and minimally invasive, with a strong emphasis on natural aesthetics and long-term function.

Rocky has a special interest in dental implants, including single-tooth and full-arch cases, with each case carefully and extensively planned to maximise predictability, longevity and patient comfort.

## COMPANY PROFILE

Rodericks Dental Partners owns and operates one of the UK's largest groups of NHS and private dental practices. The group adheres to a strong set of core values - respect, openness, flexibility, empowerment, integrity and understanding - prioritising patient care and clinical freedom for its consultants.

It now runs over 220 practices across the country, and offers a full range of treatments, including dental implants, whitening and straightening. Through continued investment in digital systems and clinical innovation, Rodericks Dental Partners supports improved patient experiences and clinical outcomes.

## COURSE SYNOPSIS

This course focuses on the fundamentals of implant restoration, guiding clinicians through the key prosthetic principles that drive predictable, long-term outcomes. It covers essential concepts such as implant-abutment connections, restorative space management, emergence profile development, and the selection of screw-retained vs cement-retained solutions across single units, short-span bridges, and full-arch cases.

Participants will gain a clear overview of the restorative workflow from diagnosis to delivery, including impression and scanning strategies, bite registration, soft-tissue management, and the planning considerations that support accurate laboratory communication. Emphasis is placed on building a repeatable approach to occlusion, aesthetics, and maintenance, helping clinicians reduce complications, improve efficiency, and deliver restorations that function and look natural.

## COURSE PROGRAM

<b>ADDRESS</b>	Nottingham Belfry Hotel & Spa Mellors Way, Woodhouse Way, Nottingham NG86PY
<b>06.30 PM</b>	Meet & Greet
<b>07.00 PM</b>	Lecture
<b>08.30 PM</b>	Q&A
<b>08.45 PM</b>	Conclusion
<b>09.00 PM</b>	Dinner (Optional)

## AIM & OBJECTIVES

1. Understand key implant prosthetic principles.
2. Choose screw-retained vs cement-retained restorations.
3. Improve implant impressions and digital scans.
4. Apply occlusion and aesthetics for longevity.
5. Strengthen lab communication and planning.
